Rafael Montrose

Atlanta, GA | rafael.montrose@example.com | (555) 010-0191

Summary

DevOps and site reliability engineer with 8 years of experience running cloud infrastructure at scale. Specialized in Kubernetes platforms, Terraform-managed AWS environments, CI/CD automation and observability with Prometheus and Grafana.

Experience

Senior Site Reliability Engineer | Lumenfield Software | Atlanta, GA | Feb 2022 – Present

- Operate 6 Kubernetes clusters running 200+ services, maintaining 99.98% availability against a 99.9% SLO.
- Codified AWS networking, EKS and IAM in Terraform modules, cutting environment provisioning from 3 days to 45 minutes.
- Built Prometheus and Grafana dashboards and alerting rules that reduced mean time to recovery by 42%.
- Redesigned CI/CD pipelines in GitLab CI with canary releases, reducing failed deployments by 60%.
- Right-sized node pools and introduced spot instances, saving $310,000 per year in cloud spend.
- Managed Amazon RDS PostgreSQL instances including backups, failover tests and minor version upgrades.

DevOps Engineer | Stonebridge Payments | Atlanta, GA | May 2018 – Jan 2022

- Migrated 35 services from virtual machines to Docker and Kubernetes, shortening release cycles from 2 weeks to 2 days.
- Wrote Python and Bash automation for backups and log rotation, saving 15 engineer hours per week.
- Implemented centralized logging with the ELK stack, speeding up incident triage by 50%.
- Led an on-call rotation of 8 engineers and cut after-hours pages by 35% through alert tuning.

Skills

Infrastructure as code: Terraform, Ansible, Helm

Containers: Kubernetes, Docker, EKS

CI/CD: GitLab CI, GitHub Actions, ArgoCD

Observability: Prometheus, Grafana, Alertmanager, ELK

Cloud and scripting: AWS, Python, Bash, PostgreSQL (operations)

Education

B.S. in Information Systems | Northgate Technical University | 2010 – 2014
