Sofia Brandvold

Denver, CO | sofia.brandvold@example.com | (555) 010-0119

Summary

Android developer with 5 years of experience building consumer apps in Kotlin. Skilled in Jetpack Compose, MVVM and Firebase, with a record of improving app stability, startup time and user ratings.

Experience

Android Developer | Pinecrest Mobile | Denver, CO | Mar 2023 – Present

- Led development of a Kotlin and Jetpack Compose rewrite of a 500,000-user app, improving rating from 3.9 to 4.6 stars.
- Raised crash-free sessions from 97.1% to 99.4% using Firebase Crashlytics, coroutines and structured error handling.
- Cut cold start time from 3.1 s to 1.9 s through lazy initialization and baseline profiles.
- Implemented push notifications with Firebase Cloud Messaging, increasing notification open rate by 25%.
- Used Firebase Authentication and Firestore for real-time sync across 3 feature modules.
- Built a small Spring Boot REST service in Java to schedule push campaigns for the marketing team.

Junior Android Developer | Wavelet Fitness | Boulder, CO | Jul 2021 – Feb 2023

- Developed workout-tracking features in Kotlin using MVVM, Hilt, Room and Retrofit.
- Wrote JUnit and Espresso tests that reduced regression bugs by 35%.
- Set up GitHub Actions to build and test every pull request, shortening review cycles by 30%.
- Reduced APK size by 18% with resource shrinking and image compression.

Skills

Languages: Kotlin, Java, SQL

Android: Android SDK, Jetpack Compose, Coroutines, Flow, MVVM, Hilt, Room, Retrofit

Firebase: Authentication, Firestore, Cloud Messaging, Crashlytics, Remote Config

Quality and tooling: JUnit, Espresso, GitHub Actions, Gradle, Android Studio

Education

B.S. in Computer Science | Northgate Technical University | 2016 – 2020
